On short notice.

**All Work**  
**GUARANTEED FIRST-CLASS**  
Leave orders at DISPATCH office.

## General News.

A storm, accompanied by rain and hail, struck the Solomon valley Friday evening at 5 o'clock. At Booit, a great deal of glass was broken out of windows, but the fury of the cyclone was greatest at Solomon City, where nearly all the glass was broken from north windows and a number of houses were destroyed, many lives were lost. Some four or five miles northwest Dennis Morgan and sister were instantly killed, and their house totally destroyed. At Benton, twenty miles northwest of Solomon, a farmer named Benjamin, his wife and a hired hand were killed and the house demolished. In the same vicinity three stone farm houses were blown down, but the inmates were in the cellars and escaped fatal injuries.

A large number of houses and barns along the valley between Solomon City and Minneapolis, a distance of twenty miles or more, were blown down, but further loss of life is not yet reported. The hail stones came down very thick and some of them larger than walnuts, and contained in the center small pebbles. The cyclone did not extend as far east as Abaline, but the rain and hail came down for about twenty minutes at a lively rate and the damage to window glass is considerable. The cyclone proper was funnel-shaped, the small end downward, and at times, as it moved on its forward course, the heavy top would career over toward the east and large jets shoot out in various directions. The display lasted about twenty minutes and the duration of the storm about one hour. The damage to the houses and crops is very heavy.

Secretary Blaine is confined to his bed with rheumatism.

Many of the discharged census clerks have resumed work, trusting to congress to pass a deficiency bill next winter to pay them for their service from now on. There will be an attempt to make this deficiency bill the basis of inquiry into the major expenditures of the former appropriation for census work. An effort was made last winter to investigate the census affairs and expenditures, but it failed, as it was charged it was investigated by disappointed persons.

Next winter this effort will be renewed, and when the bill to make another appropriation comes up, it is said that congressmen will be found to insist on showing how the census money had been expended. Gen. Walker gives general satisfaction.

A telegram to the interior department from Ute Commissioner Russell announces that the desired army escort has been furnished, and that the commissioner will at once proceed to look for lands on which to locate the Uteonphages.

The Republican's Graham special says J. E. Martin, a prominent merchant of Belknap, was called out of his residence by three unknown men, who took him off about a mile, shot him and then went to his store and robbed it of everything they could carry away. Sheriff Melton and several deputies are in pursuit.

In New York a few days ago a "poor but honest" young man bought an old trunk from a trunkman, who was taking a load of them through the street. Inside, wrapped up in a bit of paper, the young man found a diamond pin which a jeweler told him was worth \$15,000. The letters "W. H. N." on the trunk led him to believe that it might have belonged to the Vanderbilt family. An interview confirmed him in this belief. Mrs. Vanderbilt said that the pin was hers; that she "missed it several months ago," but could not account for its being in the trunk. Mr. Vanderbilt offered the young man a reward, but he said all he wanted was an easier situation for his father, who had driven a Broadway stage for twenty-one years. The situation was promised him, and a sum of money given him, and he went away happy. Think of a woman "missing" a \$15,000 diamond pin and not making any effort to find it. I suppose she thought if she left it alone it would come home itself, as did Bo-Peep's sheep. So it did, but if it had been the sole pride and possession of a poorer woman, through the perversity of inanimate things, it would have been lost forever. Speaking of diamonds reminds me that during the recent dog show in this city a little terrier on exhibition wore a fourteen hundred dollar diamond necklace. For a bed it

had a crib lined with quilted satin and trimmed with real valenciennes lace. Can the foolishness and extravagance of women go farther?

A car of new wheat, the first of the season, arrived at St. Louis Friday from Fort Worth. It is graded No. 3 red winter and sold at auction for \$1.50 per bushel. It was purchased by Geo. Bain, president of the national millers association.

A Washington correspondent writes that "under the code of etiquette, as proclaimed by Mrs. Dahlgren, Mrs. Blaine has succeeded in having herself and the other cabinet ladies as they call themselves, exempted from the ruling which forbids these ladies to step higher, socially, than the wives and daughters of the supreme court, of congressmen, of other civil officials, of the officers of the army and navy, and of the wealthy citizens who make the metropolis their winter home. They threaten rebellion, and say that next season if the cabinet ladies don't return their visits, they won't invite them to their homes."

W. L. Hull, who went to Keokuk on Wednesday to meet the charges made against him there by Kennett & Co. of irregularities in connection with the Keokuk elevator, left for St. Louis Friday night with his counsel, Gov. T. Fletcher and W. H. Clayton, the charges against him being entirely without foundation and have been abandoned.

Mrs. Gen. Grant, who has been quite ill since her arrival at St. Louis, is reported considerably better.

An opinion of the supreme court has been sent to the senate to the effect that it is the duty of the present legislator to elect a United States senator from New Hampshire.

A man named Harman and his son were killed by lightning on the 11th inst., near Baltimore, another had his thigh broken, and several others were stunned by the shock. They were strawberry pickers, and had taken refuge from the rain storm in an old building which was struck.

St. Louis, June 12.—The grant party are still at the Southern, and will probably not leave before to-morrow. Fred Grant arrived last night and will remain with his parents until they leave. The General drove down to his farm this morning in company with John S. Cavender, who will manage the place hereafter. He is anxious to get away but Mrs. Grant's illness delays him. She is still confined to her room but is reported as recovering slowly.

St. Louis, June 12.—This is the first opportunity that science has ever had of viewing the eclipse of the moon aided by an Electric Light of 32,000 candle power. The scenes at the Water Tower last night were peculiarly interesting.

**Condensed Telegrams.**  
The mercury marked 104 in the shade at Carthage, Mo., on the 11th. Judge Cather's residence at Quincy, Ill., was destroyed by fire on the 11th. Griscorn, the Chicago faster, has entered upon his fifteenth day with a loss of twenty pounds only.

John Connors, the Espanola desperado, was taken out of jail on the night of the 11th and lynched by masked vigilantes.

Joe Flint, a notorious burglar of Kansas City, was killed by a passing train on the 11th while escaping from detectives.

The first American railroad started from the Rio Grand on Mexican soil, known as the Mexican National, has broken ground.

The elevator of the Chicago, Milwaukee and St. Paul railroad at Faribault, Minn., burned with 150,000 bushels of wheat.

Wm. Ryan, arrested at Nashville, for robbing the Mussel Shoals Canal paymaster, has been identified as one of the Glendale express robbers.

Missouri Scott, a colored girl, of Clermont county Ohio, has entered suit against the School Board for debarring her of school privileges.

Able Ray, a colored farm hand at Athens, Ky., was murdered on Friday by Ike Turner, whose mother had raised a false report concerning Ray.

Commencement exercises were held on the 11th at the Beattie, Stuart Institute, Springfield, Ill., Sparta High School and the High School at Joplin Missouri, and Keokuk, Iowa.

Hayes White, the colored murderer of Sheriff Beattie, was executed at Marion, Arkansas on the 11th in the presence of 2,000 people. On the

scaffold he sung "Why Should We Mourn."

William Barry, alias "Billy the kid" of New Mexico, who escaped from Lincoln county jail, April 30, has added three more victims to his list. Three cowboys in the employ of John Chisum were murdered without provocation.

The town of Seven Star Springs, Barry county Mo., was visited by a terrific storm on Friday at noon. Houses, tents and cattle were swept away by the flood pouring down the valley. At Joplin and Carthage, Mo. the effects of the storm were visible on all sides.

A severe wind and hail storm occurred on the 11th at Solomon City, Kas., destroying the crops and washing away six houses. W. L. Frothingham and wife, Geo. C. Combs, farm hand, D. Morgan and sister and two persons unknown were found dead after the storm. The tornado extended to the town of Americans, near Emporia, destroying the Methodist and Presbyterian Churches and nearly every building in the neighborhood. Considerable damage was done at Emporia and the State Normal School was unroofed.

**Foreign.**  
London, June 12.—The American Dory "Little Western," which crossed the Atlantic from Gloucester, Mass., to London last summer, will start on the return journey the 14th inst.

The death is announced of Andrew Willson, traveler and journalist, who at different periods edited the China Mail, the Star of India and the Bombay Gazette. He visited America in 1861 where he was well known as the author of the "Abode of Snow"

The Times, remarking on the growth of lawlessness in Ireland, says: One experiment which is most obvious and most certain to succeed remains untried. If one mob of Fenians or Land Leaguers, or of whatever other title, were just for once not supposed to have its own way—if its appeal to force were met and rebuffed—

mob was dispersed and forbidden to re-assemble—the consequences might be happy in the extreme. One victory of law would be the signal for others. The objections to such an experiment are obvious, but not conclusive. The forcible dispersion of a mob in Ireland would be certainly followed by a howl of execration from their Parliamentary friends and champions. The Irish press, which is silent over the injuries to the police, would be eloquent in the case we are now supposing. But the Land League would receive something very like its death blow, and might itself fall into the contempt with which the law is now treated in Ireland.

A dispatch from Stockholm states twelve vessels are fast in the ice at Oregund, Gulf of Bothnia and two schooners foundered. The fate of the crew is unknown.

A letter to the Times from Tunis, dated the 9th inst., shows the prevalence of typhoid fever among the troops continues. The occupation of the Regency is difficult. Temporary hospitals are full. Great efforts to conceal the true state of affairs are made. The French have withdrawn from Fernona without effecting anything. They found the country almost impenetrable and were continually harassed by the Kroumirs and typhoid fever.

Liverpool, June 12.—The prisoner McKevett and Roberts who attempted to blow up the town hall have been formally remanded.

The examination of the men captured in the attempt to blow up the town hall took place to-day. The prisoners were charged with damaging a building with intent to commit murder, and also with laying explosives with intent to damage a building. The man who at first gave the name of Roberts has since his arrest given it as McGrath. A strong force was present at the examination. Only persons having business were admitted to the court room.

Tunis, June 12.—After the ratification of the treaty, Roustin, the French Minister, invited the Bey to visit Paris, but he declined.

Geneva, June 12.—A very perceptible earthquake shock in the valley of the upper Rhone on Friday extended as far as this city.

Chios, June 12.—A renewed shock of earthquake on this island to-day overthrew a minaret and several ruined houses. Two men were injured.

H. M. BUTLER, : : Editor.

Eureka Springs, Ark., June 15, 1881

The emperor of China who is only eleven years old, has been attacked by the measles.

EMIGRATION to the United States is now much larger than ever known in the history of the country.

THERE are said to be over sixty thousand miles of wire now in use in this country by the telephone system.

The Ohio Republicans now come forward to approve the Mahone movement. In other words they muster into line to sustain repudiation. The people in sovereignty will rise to defeat a policy so foul, a support so marked by partisan prejudice.

STATISTICS show ten thousand more deaths than births in the city of New York per annum. Imperfect sewerage, filthy streets and crowded tenements in parts of the city are said to be the cause of this destruction of life. The same work of death in a less degree is going on in all the great cities of the Union from the same cause.

AFTER writing that severe letter of criticism against the administration to Senator Jones, Grant is now inclined to excuse Garfield in a measure for the Conkling disturbance, and lays the blame on Blaine and the N. Y. Tribune. That worthy functionary and the journals can well bear the burden, since they carry with them the commendation of the country at large.

ROBERTSON thinks the New York Assembly will accomplish its work and adjourn before the first of July, at which time he expects to enter on the commissioned business of collector of the port of New York. From present indications his expectations may be cut a little short. His commission is ready to be filled as soon as the Conkling-Platt affair is settled.

The late Cote Brilliant races were not all that was expected. The West has not given the attention to the turf that would give the success in this field that our eastern neighbors have had. The attendance at the track has been small, receipts low and interest lagging. The metropolis of the Mississippi valley must stir up or look in another direction for laurels.

The greenbackers of Iowa have backed course to another tide of reform. They recently nominated Mrs. Mary E. Nash as their candidate for superintendent of public instruction; but she promptly declines the honor and expresses her determination to abide by the doctrines of her old party. Our greenback friends must swell their heresies to larger proportions before they can expect to bag game by such schemes.

There is talk of nominating Mr. Tilden for governor of New York on the democratic ticket next year. Although the democrats stand a fair chance of carrying New York, in view of rupture in the republican ranks, it is very doubtful if Mr. Tilden could be elected. He has the pronounced enmity of every thief, bummer and blackleg in the party; and the corrupt elements, led by John Kelly, have proved strong enough in the past to defeat him. But it would be a blessing to the democratic party and the country if Mr. Tilden were to resume his leadership. The democracy won its only national victory in twenty years under Mr. Tilden's cap-

taincy, and when at the bidding of John Kelly, it cut loose from him, it met with an overwhelming and deserved defeat. By the way, Mr. Tilden's health is reported excellent and his mind is as clear and vigorous as ever.—Evening Star, (Hot Springs, Ark.)

You are both right and wrong, Bro. Mays—right, in consigning the leadership of the democracy to whom it so wisely and justly belongs, wrong in doubting that the grand old champion of reform could not be elected to the governorship of the Excelsior State if he would. But we have a greater work and higher place for him, the office to which the suffrage of the nation elected him in '76. "Tilden and reform" is a new song again, and the people see the purity and greatness of the principles that governed him. Here truly is a spectacle for the admiration of a great people! Exalted to the highest place in the gift of the people and robbed of it by corruption, he had the magnanimity to yield his very highest rights to the superior demands of peace. The old sage of New York, is the coming man for '84.

Also in connection with the establishment a Dyeing, Repairing and Plain Sewing Department. Charges reasonable and good work guaranteed.

# AN INTERESTING LETTER ON THE FAMOUS EUREKA SPRINGS

Good Advice—A New Theory of the Medical Quality of its Waters.

EUREKA SPRINGS, JUNE 10, '81.

Editor Dispatch:

"Eureka!" cried Demosthenes, leaping from the bath. "Eureka!" also, might have said the original discoverer of the virtue of the celebrated spring in Carroll county, Arkansas. In olden times, men searched for the philosopher's stone, the "elixir of life," and years were spent by alchemists in fruitless experiments, after that which would give a new lease of life. It remained for the nineteenth century to disclose the cauldron in which nature has for ages been preparing a water more potent than the old sages and alchemists ever dreamed of.

In a region unexplored, a vast wilderness, whose mountains and gorges were untrampled and almost unknown, an accidental panther hunt revealed the virtues of a spring, destined to become more famous than any ever known. While some of the old studies now hope in the invalid, and thrills the bosom of those given over by physicians, as beyond the reach of all medical aid, with new desire for life, and nerves the despondent with power to make a last trial. Never before has a word produced a like sensation.

An army of invalids are on the march, and the cry is, "Still they come!" Twenty thousand health seekers are now drinking Eureka waters, and a city throbbing with the activities of new life is being erected on the mountain tops and sides. On every prominence, and along every gulch there are springing up cottages and mansions in every style of architecture, while the groves are filled with dwellers in wagons and tents, who for want of material to build, are compelled to put up with frontier accommodations. From the north and south, and from the far west they come; whole families, not for gold, but health. Every wagon holds its invalid.

A line of coaches brings the passengers that arrive by rail to Seligman, twenty miles distant, over a most execrable road, but so great is the desire to reach the goal, that the discomforts are cheerfully endured. Once here, the past is forgotten, and amusements succeeds and parties are lost in wonder at what is almost incredible. A city of two years' growth stands in majesty before them. Eureka has unparalleled beauty of location, purity of air, and efficacy of water. The air is of the proper temperature to suit the invalid. Highly oxygenized, and full of ozone; it is preservative, just the medicine for the consumptive, while it stirs into activity lethargic systems, and tones up overwrought and tired out nerves.

In the peculiar formation and location of the springs at the foot of the slopes nature compels an exercise of muscles in descending and again ascending the mountain sides, that those dwelling on the plains and accustomed to walk in level cities never before brought into activity. The lungs are also compulsively expanded, and the result is the system receives more oxygen and electricity, purifying the blood, and increasing the nerve force; morbid matter is eliminated. Three great agents are at work; air, water and exercise, but the chief of these is the water.

The Eureka Spring water is magnetic. The chemist cannot find any solids that are usually found in mineral springs. It is neither chalybeate, sulphuric, iron or salt; clear pure and agreeable to the taste, and not to be distinguished from ordinary soft spring water. Invalids are puzzled to know wherein is the power that produces such famous results.

I suggest this theory: The strata of rock through which the waters flow have deposits of silver, copper and lead. These may not be in great quantity, but sufficient to impregnate the water as it percolates with an electric, a magnetic property. The rains that fall upon the porous mountain surfaces carry down from the atmosphere nitric acid, and an action similar to that of the zinc and copper plates in the galvanic battery on the acid water in the trough is the result, and an elimination of galvanism that endows the water with magnetic quality follows. The sources of the springs are not deep, but near the surface. Their channels are also near the surface. Shafts sunk, and the swelling of the streams after a rainfall prove this. We find then, an immense filter among whose rocks and sandy particles, are deposits that act as above described, on the acid water descending from the clouds. In other words a large galvanic battery is here constructed, and the water so freely drunk is filled with that great life element, galvanism, which is only a different disposition of the electricity that lights the sky in the thunder storm, or carries the mis-

sage along the wire. In the human system it is nerve force, or fluid, and prime cause of health.

The peculiar potency of Eureka water can, by the above theory, be accounted for, and the geologist and miner, will in the near future, corroborate it.

The cures are wonderful. Ask the thirsty pilgrims crowding around the springs. They will relate cases of cancers, rheumatism, blindness, sore and weak eyes, ulcers, kidney weakness, asthma and chronic indigestion that have been cured, and furnish the most indubitable evidence, as to the truth of their statements.

As a sanitarium, Eureka Springs is without a rival. Air, water, scenery, temperature—all conspire to recommend it.

Cheapness of living and freedom from extortion invite the poor, who are shut out from more fashionable places. The rich and poor meet on equal footing here.

God, in his divine providence, has here prepared a grand cauldron in which to purify the human race, and given to the suffering without money or price, and none need be without a local habitation or home. While the Divine Father has thus bountifully furnished a panacea, some of his children blindly, ignorantly and selfishly, are violating laws that will ultimately exact a heavy penalty, and produce conditions destructive and subversive of all healing powers. In selfish greed for land, localities have been built upon that ought to have been free from everything but the forests, originally crowning their surface. Science and the warnings of past history ought to have been considered, and the slopes above the spring should have been preserved as clean receptacles of the waters falling in rains. Men are often so short sighted as to thwart the very means employed for their benefit, and act as foolishly as did the woman who killed the goose that laid the golden egg. Upon these beautiful slopes are depositories of excrementitious matter, and under the solar heat decomposition is going on, and disease-bearing germs are washed down to mingle with the water below on their passage to the springs. Thus, charged they are carriers of death and not life.

The Israelites on their journey through the wilderness were governed by stringent sanitary laws, and no decomposing matter was left uncovered to send off poisonous germs. Frequent changes of camps were ordered. In London the plague was the result of decomposing animal matter. Cities have often been scourged by a pestilence, and towns by a disease, the result of drainage from cess-pools with springs and wells. Eureka is a great camp, and there is the most blind neglect of sanitary law all over the slope above the spring; and if continued the water will be destroyed. Its healing power antidoted by poisonous germs, and it would not be surprising if a pestilence would entirely depopulate the place and deter from coming the thousands whose eyes are now looking to it as a mecca.

In the place of a live, beautiful, and busy city there will stand a spectre resembling some of those seen in the once prosperous oil regions. This must not be, it need not be. It will require heroic treatment. The remedy must not be given in small doses. Amputation is sometimes necessary to save a limb. Speedy and complete vacation of the slopes should be urged and enforced. There is no necessity for crowding so closely upon the land contiguous to the springs. There are other slopes, and an extensive domain in every direction. Street cars and dummy engines will speedily bring the remote places near, and elevators will drop visitors close to the waters whenever they wish. Until such vacation is enforced there should be a stringent law to remove all slops and excrementitious matter far beyond the city limits, and dispose of them so as not to offend the senses or breed disease. Thorough inspection of premises, and speedy removal of offensive matter is necessary, or the month of July will witness a stampede.

I say this in the interest of the masses of invalids; their health is of more importance than the convenience of those who are offending. The wealth of parties, and size of hotel or mansion are no excuse. The few must yield for the welfare of the many. It is only necessary to pass by some of the premises lining the paths to Eureka Basin Spring to get full confirmation of the decomposing condition of the contents of retiring closets. It is not the odors of "Araby the Blest," that greet the pilgrim with his water can. It is the avant courier of pestilence. I believe the worthy mayor, who is represented as a noble and executive gentleman, and the council are truly alive to the interests of the community; but their chances

are small and their means limited, and it is out of their power to do much. There should be representative influence brought to bear on the general government so as to secure proper aid.

Citizens might assemble in meetings to consider and agitate methods for reformation. All should sink self for the general good, and every citizen should try to make Eureka what it can be made, the wonder of the 19th century. A beacon light to the afflicted in every land.

Prof. J. K. HENRY.

CROSS & DIVERIS

DAILY

Stage Lines.

EUREKA SPRING

SELIGMAN.

Leaves Seligman daily at 12:30 p. m. for Eureka Springs at 7 a. m. and arrives at Seligman at 12 o'clock. Runs in connection with the regular U. S. mail line. Office on Spring street, at the railroad and telegraph office.

# The Daily Dispatch.

Eureka Springs, Ark., June 15, 1887

## SPRINGS SPOUTINGS.

—All quiet in police court.  
—Too hot for much to happen.  
—See notice of auction in another column.  
—Matinee this afternoon at the Palace Theatre.  
—Our merchants report business brisk in every line.  
—Excavations, erections and improvements on every hand.  
—Streets thronged yesterday with vehicles and pedestrians.  
—The Palace Theatre band was out last evening discoursing music.  
—The post-office was less crowded yesterday than for many days past.  
—The excavation for the new hotel on Spring Street is progressing rapidly.  
—A. A. Tarbell will soon have his store room on Spring street ready for occupation.  
—Three valises were missing from the Seligman stage upon its arrival here Monday evening.  
—The blind fiddler and violin soloist drew quite an audience at the Harding spring last evening.  
—See in another column the notice of glassware, etc. Hotel and boarding house keepers take notice.  
—An artist was at the Basin Spring yesterday morning painting a view of the Spring and its surroundings.  
—A full list of arrivals will be found in this morning's issue. They were crowded out yesterday by other matter.  
—Eureka Springs has between two and three thousand houses, according to the calculation of an observant visitor.  
—Mayor Carroll has returned and is now ready to be interviewed by evil-doers. He is a terror to that class.  
—Eureka is not alone in sultry weather. Reports from the northern and eastern States say the heat is oppressive.  
—Common council will at once remove all obstructions within the radius of one hundred feet from the Basin Spring.  
—Wonder if this weather doesn't draw perspiration from the Eureka Baby? If it would take exercise we are sure it would.  
—Improvements in the vicinity of Harding Spring continue, and the popularity of the Spring is increasing correspondingly.  
—An express driver and a stranger had a wordy combat at the Mountain House yesterday noon over fifty cents charges on a trunk. Much smoke but no fire.  
—The hotels are all thronged with elegant ladies and gentlemen. Hancock, Metropolitan, Southern and Mountain are overflowing.  
—A blind man with a fiddle attracted large crowds on the street corners yesterday by relating the story of the Arkansas Traveler.  
—Parties wishing extra copies of the DAILY DISPATCH for their distant friends can obtain them in wrappers at this office and have them mailed free of charge.  
—Postmaster Johnson has ordered looks for eight hundred new boxes for the postoffice, and the work will be done and boxes put in as soon as the looks arrive.  
—The dirt, taken from in front of the bank on Spring street is being dumped on Mud street, in front of the Opera House, and greatly improving the vicinity thereof.  
—Dr. Wilson has opened up a superb suit of dental rooms in the new Blankenship building. He is a gentleman in the highest sense of that word and most efficient in his line of work.  
—The excavation at the Harding spring is nearly completed. Seats have been arranged under the bluff, and many visitors stop from their walk to rest, enjoy the cool breezes and drink from the living rock fountain.  
—Chew, Holladay, Silver & Co. shipped yesterday 350 gallon bottles filled with Eureka Basin Water.—These gentlemen ship entirely in sealed bottles, thereby preventing the escape of any gases the waters may contain.  
—Capt. Sanford gives his free opening to-night, and particularly invites the Mayor and all city officials to call on him at his new tabernacle, in rear of his "New Idea" house. Vocal and instrumental music in abundance. City press gang are all expected.

—Everybody who has the interest of the poor people at heart should go out this afternoon at 2 1-2 o'clock. The entire proceeds go to the poor, and besides you will get three times the worth of your money in amusement.

—A farewell benefit now greets the editor's nasal organ. The spoilt camed goods of the adjoining establishment, thanks to the City authorities, are being moved to some other doomed locality. A dozen epidemics are being distributed by this establishment.

—Mr. Stutz, our genial operative friend, took in Eureka yesterday. He found only twenty-two springs, and people drinking at each one. He estimated the population of Eureka at only twenty thousand. Who says twenty-five? And still they come!

—The Dispatch force are smiling happy and cool with shorn heads. Conover and Warren's little clippers did the work. If you are sweltering in heat with heavy heads of hair, just go to the Mountain Barber Shop and get a clipper—only part in the city.

—Everybody should remember the grand Fourth of July. Elsewhere will be found a call to the citizens to meet this evening at 7 1-2 o'clock to consider the matter and make necessary arrangements. A grand ball has been decided upon at the Southern, committees are appointed, and a grand time may be anticipated. Tickets to the ball have been placed at \$2.

—A German lady, from Leavenworth, Kas., arrived Monday evening on the Seligman stage. When she got off she found her valise, containing fifty dollars in money and a gold watch, among other things, had been stolen. Suspicion points to a young man, who rode on the outside with the driver, as the thief. No arrests have been made and no definite clue can be obtained.

—On next Sunday morning we will issue the first number of THE WEEKLY DISPATCH. As set forth in the outset THE WEEKLY DISPATCH will be Democratic. The subscription price of the Weekly is \$2.00 per year, payable strictly in advance. We will endeavor to make THE WEEKLY DISPATCH the best family paper in North-west Arkansas. Now is the time to send in your subscription.

—No one is so blest as we. At night we are charmed with the music of forty organs, ten pianos, twenty flutes, sixteen accordions, twenty-five fiddlers and five hundred french harps, all industriously going at once. We enjoy a good thing but won't some one take our place for a while and let us go out into the country and rest. We want to hear the cricket and the owl for a while.

## Don't be too Zealous.

We met a few days ago a very pleasant gentleman, Mr. A. S. McCormick, from Rockford, Indiana, and as his experience has been that of many others the report will be of interest and profit to our readers. Some visitors came to the Springs in a great degree incredulous as to the efficacy of its waters. Indeed, it is quite natural that they should disbelieve in some measure the stories of the wonderful cures that are actually wrought until they have seen or experienced for themselves; for no evidence is so complete as that given by personal knowledge or experience. The writer himself was at first as incredulous as the most skeptical of the virtue of the waters, apparently so pure and free from salient properties; but the many cases of strange and complete cures that have fallen under his direct observation have effectually removed doubt. But hear Mr. McCormick's report: "I came to the Springs for my wife's health; have been here a little more than one month. She has been troubled with liver complaint and indigestion, and has been unable to eat and was compelled to take medicine to regulate the action of the liver. For the first week after arrival she improved very slightly. After this she had a chill and grew worse and was despondent. I became dispirited and was determined to leave the Springs. Had I gone at that time my report would not have been very favorable to the waters. Was persuaded by friends and those who knew more of the Springs to give a further test. Shortly after my wife began to improve and since that time has gained rapidly. She now has a good appetite; can eat with impunity and the liver and digestive organs are much quickened in their action. I now think much better of the Springs and am satisfied of the virtue of its waters."

Mr. McCormick's story is to the point. Whereas there are and have been many cases in marvellously short time; a large number have been perfected only after several months and many after more than a year. The nature of his malady and the condition of his system should be considered in determining whether results should be expected in greater or less time.

Among our public spirited and men none in the city is more active reliable than Mr. Thos. Paine, Quincy, Illinois. Two good indications are that he is building a new hotel and has become a year's subscriber to the Dispatch.

Mrs. Park's elegant residence, in New Town, is fast approaching completion. Her promised "warning" will be easily gotten up thermometer at one hundred in the shade. Do let us have it?

Mr. I. S. Williams and his family of Paris, Texas, much to the regret of their many friends, will leave the city this morning for St. Louis. We hope they will come again.

W. A. May, representing a St. Louis wholesale house has been in the city several days and will leave to-day.

Miss Phoebe Conzins, the well known woman lawyer of St. Louis and a prominent advocate of the rights of her sex, is registered at the Southern.

J. W. Moffatt, representing the house of Memphis, (the house in the south) called yesterday.

Dr. J. D. Wyatt, of Wisconsin, was among the callers at the Dispatch office yesterday.

W. P. VanHoozer, a merchant of Roseville and formerly of Fayetteville is visiting a few days at the Springs.

Mr. Blair Boone, who has been at the Springs the past week looking after city property, returned to Searcy this morning.

## Benefit.

It is the history of watering places, especially those of sanitary character like Eureka Springs, that many of the poor and afflicted come to drink of the waters and are unable to provide the common necessities of life except through the means of charity. Quite a number of unfortunates at the Springs have been in this condition. At the same time there have been impositions upon the public that have closed its hand in many cases against objects of true charity. The desired end is not well reached without systematized methods of giving; and we have suggested, and it has been proposed, to form an association for the relief of the poor with noble women of this city, as the most faithful workers, at its head. By this means the monies contributed would be husbanded and dispensed where most needed and much good be accomplished. A gift of this kind is a loan to the Lord, and there are many here who would gladly contribute to such a fund. But this charity is drawing aid from a source unexpected and which it behooves us to encourage and appreciate. Mr. Stutz's Dramatic Company, now playing so successfully in the city, have generously volunteered to give one benefit each week during their stay, the entire proceeds to be devoted to the relief of the poor, the management bearing all expenses.

This afternoon's matinee at 2:30 o'clock at the Opera House is set aside for this benefit, at which time will be presented the popular drama, "Fanchon, the Cricket." A committee of five ladies will have charge of the tickets and receipts. Let all who can, turn out, and have the satisfaction of contributing to a good cause, and enjoying at the same time an excellent entertainment.

## HOTEL ARRIVALS.

METROPOLITAN HOTEL.  
G. P. Broadwell, W. H. Burford, L. B. Clark, B. Morris, W. C. Chandler, B. Weaver, Laura Whitson, G. N. Wilson, S. M. Holliday, W. S. Johnson, Mr. J. W. Moffatt, Tenn; W. P. and C. P. Mitchell, Ga; B. H. Anderson, Ark; W. H. Miles, Miss; S. E. Atchison, St. Louis; Wm S Speers, Galveston, Texas.

Board at City Restaurant \$3.50; board and lodging \$5. Convenient to Basin—near postoffice. 55-4-t.

## Hurrah for 4th of July!

A meeting of the citizens and visitors of Eureka Springs is called to meet this evening at 7 1-2 p. m., at the tent back of the post-office, to discuss and decide upon a place for celebrating the 4th of July. Everybody is invited. By order of the COMMITTEE.

## Stutz Opera Troupe.

Miss E. Alma Stutz in the elegant role of Lady Isabelle and Madam Vinnie. In any character assumed by Miss Stutz the author is complimented. She is the very Lady Isabelle that filled the mind's eye when the author conceived it and wrote the piece.  
Mr. Stutz as Sir Francis was a most perfect scoundrel (or appeared to be) and well sustained his high position as a finished actor. Versatile and pliant enough to be any character he may assume, grave or gay, priest or villain, he feels it and makes it.  
Miss Nellie Sabini as Coney, well she is a character. She is in fact, and one that her audience will never cease to admire. They will laugh if she just says so, and the smile will appear by just looking at Miss Nellie Sabini. The smothered giggles of the finished city belle will broaden into audible dimensions at one quizzical play of her features, but just let her "go and say look at me now if you dare" and convulsions and spasms of laughter must and will come. She is a stately, splendid woman on the stage, "and off the stage, too," our junior boss says.  
This evening at 2:30 o'clock a grand entertainment will be given for the benefit of the poor of this city. And to-night the most laughable comedy perhaps ever written, "The Serious Family."

Evidence accumulates that our British cousins are preparing for a grand quarrel with us. The Geneva Award has rankled in their bosoms for several years and the capture of the Derby stakes by an American horse the other day was to their passion like fat to a fire. But the St. James Gazette brings a charge against us which, if proven, can hardly lead to an open rupture between the countries. It says that recently mosquitoes made their appearance in South Belgravia, the fashionable quarter of London. The insects, it claims, were brought to the country in the luggage of some American traveler. The only doubt would seem to be whether the luggage which carried the awful creatures to Belgravia belonged to an American citizen or some English tourist who had been rambling about in the swamps of New Jersey by way of recreation. At all events, it is claimed that one of these horrid, imported mosquitoes stung Mr. O'Shaughnessy, M. P., on the nose quite recently. Erysipelas supervened and the honorable gentleman has been prevented from attending to his Parliamentary duties. Nothing but a real old Jersey borer could lay a man out in that style, but we can't help thinking that O'Shaughnessy was suffering from a disordered system before he encountered the mosquito. The bite of a blue fly would probably have thrown him into tetanus.—Post-Dispatch.

For SALE OR RENT.—A new house, well adapted for boarders, on south end of Mitchell street, five minutes walk from Harding spring. For terms inquire on the premises.  
D. R. WHITCOMB.
